

1 - Prompt

Hello! Please make me a one-page resume with my details, please format it in a minimalist style and it should also have a section breakdown.

Please keep it short and concise, remove any redundant information, and please make it suitable for an entry-level job application.

FULL NAME

Kristine Anne G. Barbosa

Here's a clean, minimalist one-page resume with clear section breakdown and concise content:

KRISTINE ANNE G. BARBOSA

kagbarbosa@addu.edu.ph

EDUCATION

Ateneo de Davao University

Bachelor's Degree (Ongoing) | 2023 – Present

Malayan Colleges Mindanao

Senior High School | 2021 – 2022

Ateneo de Davao University

Secondary Education | 2017 – 2020

SKILLS

- Digital Illustration (Procreate, Paint Tool SAI)
 - Photo Editing (Adobe Photoshop)
 - Animation (ToonSquid, Live2D)
-

EXPERIENCE

Intern

La Herencia Davao | 2025

If you want, I can also:

- Add a short **professional summary** (good for entry-level applications)
 - Tailor this for a **specific job** (creative, office, media, etc.)
 - Export it into a **PDF layout style** (with spacing and typography suggestions)
- =====

3 - Comparison Table

Criteria	Google Gemini	ChatGPT
Structure	Adds more words than intended	More minimalist and concise wording
Clarity	Unclear, unfortunately hallucinates or makes up information	Very clear, but boring
Formatting	In favor of more detailed informative phrases	Cleaner formatting
Overall Quality	Better format, however less hallucinations would help increase quality	Concise format, follows prompt, however very bland in terms of content.

=====

4 - Reflection

1. Which LLM performed better and why?

ChatGPT performed better than Google Gemini, because the latter ended up “hallucinating” or making up information that was not prompted. ChatGPT followed the instructions properly, and avoided falsely generating information by sticking to the information given on the prompt, however, Google Gemini was structured nicely, if only it didn’t deviate from the information of the prompt.

2. What differences did you observe?

Both LLMs were very fast in generating responses, however ChatGPT’s LLM seems more advanced compared to Google Gemini. Furthermore, Google Gemini followed the prompt directly, leaving out suggestions or asking questions on what prompters might want to add. ChatGPT suggests more improvements and asks for instructions from prompters.

3. What improvements did you make in your final resume?

I completely stuck with ChatGPT’s minimalistic format, while using Gemini’s more informative name, address and contact information on the top of the resume. The rest uses ChatGPT’s simplistic resume because I felt too lazy to correct the misinformation generated by Google Gemini. Honestly, both generated results are structurally good, but the minimalistic style is what I want to lean towards because I’m boring like that.

4. What did you learn about prompting?

Prompting is efficient if I want to get fast results, however, both results are almost the same. Not every LLM is going to generate the same results, probably because it’s trained on different datasets. In terms of making a detailed CV, I think I should stick to writing it myself if I want it to stand out, but generating templates really help with getting the job done faster
